QR Code Link to This Post Puppies are ready for their new homes now!!

Puppies have had tails docked, dew claws removed, first shot, deworming treatment, raised indoors, and socialized with children. Mom has papers; however, dad does not. Puppies will not have papers, but are full blood with parents on site.

It is important that you are familiar with this breed. They are wonderful dogs and loyal beyond what we have ever seen. Even at 60-80lbs they still feel like they are lap dogs. The need exercise and are indoor dogs. You must take the time the first 6 months to train them. Please google information concerning these dogs as we want them and you to be happy!

They will come with first round of puppy shots, deworming, akc papers-limited or full, and small bag of puppy food. These babies will be ready to go in January. Email for price or questions. Located in Pelham Alabama. Tails docked dewclaws removed.

Re-homing fee does.
