QR Code Link to This Post The Dinghy Sling continues to be an affordable solution for taking your dinghy with you on your cruise. The sling system floats behind your boat ready to accept your dinghy and then is cradled by the sling. The dinghy is then lifted up to desired height on your transom or on the swim platform then pivoted to any angle you choose utilizing adjustable staps and specially made loop straps which connect to cleats, railings or stanchions. Once Snug, the Dinghy will not move or bounce around even in rough seas. See the benefits below:

360 degree flotation.

Strong, Portable, Lightweight, UV resistant with all marine grade materials and strongest buckles available (200 lbs breaking strength each)

Webbing specifically designed for increased strength and stiffness for our company only!

Easy lifting and lowering with quick deployment for emergency situations.

Can be stored straight up or at any angle you choose so as not to block view from behind.

Can prevent man overboard situations where the dinghy could catch you.

Works on Sailboats / Power boats with or without a swim platform and even sides of docks to keep walkway clear and dinghy free of bottom growth.

Will carry Kayaks, Row boats, Towables, Lightweight RIB's and Inflatable's even with small outboard motors. (2 Cycle 2-8 HP recommended)

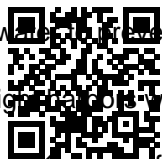

No Drilling, Bolting, Gluing or permanent modifications to your Boat or Dinghy. No more cracks in fiberglass!

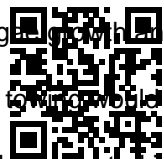

Keeps your fence out of water to prevent algae growth and drag

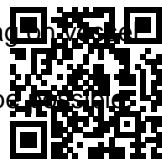

Helps in manoeuvring in tight spaces where a winch would not be

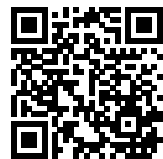

Reduces chance of Dinghy / Kayak theft while supported in sling

Testing has shown reduced engine exhaust noise on peak and k

1 person operations.

Feel secure knowing your company is right behind you ready to deploy in a moments notice.
