QR Code Link to This Post I need to use your internet connection! It's actually very easy on your part, you must download teamviewer on your computer. Then allow me to remotely control your pc for about 10 min. I can only use IP addresses from private home networks, NO shared connections or public networks.

No bs, I will pay you for letting me use the connection, and I will not do anything malicious to your computer.

Can pay via paypal, bitcoin, litecoin, etc..

If your interested, please lookup and download teamviewer first, I don't have time to run everyone threw a tutorial on the software.
