QR Code Link to This Post I need to update my life-modeling port and need a photographer to shoot some simple nude or implied imagery similar to what I have posted here, just newer, and better quality (these were test shots I did a couple of years ago). No pay-just swap services and we expand each other's ports, should take about an hour or less, and I will pose for anything you need (lighting tests, etc.). Would love to create with a professional, but talented amateurs, hobbyists or students are also encouraged to reply, just please have a studio space or other safe, private location available. Nothing erotic, these images are meant to be submitted to art schools and artists for paid modeling consideration.

Please contact!
