

Neuroimaging study for teens (ages 14 (15, USD)

Location **Massachusetts**
<https://www.genclassifieds.com/x-781704-z>

QR Code Link to This Post We at MIT and McLean Hospital are currently recruiting adolescents (ages 14-15) and their parent for new research seeking to understand the teenage brain.

We offer the opportunity for young persons to gain experience in the neuroscience research process and get pictures of their brains at no cost to them. Adolescents can also earn up to \$345 and parents can earn up to \$75, plus travel expenses for their participation.

Participation requires 2 sessions at McLean Hospital in Belmont, MA, and one session at Massachusetts General Hospital in Charlestown, MA, and involves routine psychological assessments and safe/non-invasive brain imaging.

For more information and to sign up please continue to this brief survey: <https://redcap.partners.org/redcap/surveys/?s=FLTCKXALMX>
If you would like to learn more about the study contact Isabelle at
