QR Code Link to This Post Hello I have an investment opportunity for someone that's willing to take a chance. I am dealing with a hold on my account because of a tax lien due to trying to transfer funds to this country my account was frozen and need to pay 80k I won't draw the story out but I have to pay this restore my account. I understand that asking for an 80k investment is a lot upfront so I lowered it to make it easier and I can get multiple investors to get this taken care of. I have over 5 million in this account and whomever helps pay off this tax lien I will reward them with 50k and it DOES NOT have to be paid back to me.

This is an offshore account with Lloyds Bank. It will take about two weeks after payment to receive the funds but probably sooner. For your protection you can pay with a credit card or a bank transfer. I am able to provide proof of all of this as well.

If your only able to pay half of a portion we can work out a deal for that. Please do not ask obvious questions such as "If you have all of that money why can't you pay the taxes?"

I am also willing to meet up if your in the Cali area and we can sign any documents. Send your contact info if interested and I can give you a call or you can call/text me thank you.
