QR Code Link to This Post Thanks for reading my posting...

If you are interested in learning to play jazz guitar, or taking your current playing to the next level, my structured teaching methods, along with twenty years of performing, recording and teaching experience can help you achieve your goals.

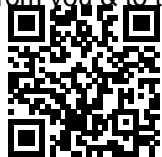

I approach the study of the guitar in a practical and musical way.

Harmonic & melody based single note soloing, chord melody & chord improvising, comping, repertoire building, practical & useful music theory, the study and application of classic jazz solos, are areas we will focus on.

I tailor each lesson to the individual student.

You can see some of my jazz video clips at <http://www.youtube.com/joegig> & please visit my websites: <http://www.joegiglio.com> & <http://www.youtube.com/joegig> for music/video samples and bio material, and feel free to call me @ with any questions, or to schedule a lesson .

I look forward to hearing from you & to the possibility of working with you to develop & improve your playing.
