QR Code Link to This Post We need to re-home a medium sized, 1 1/2 year old chocolate lab/pit named "Cocoa". We have only had him for a little over a week, I'm sad to say, he doesn't get along with my husband's friends. He loves my husband and was introduced to two younger men today and loved them....they were "scrawny", my husbands friends are not. We think maybe a bigger gentleman treated him poorly the first six months of his life???? We have no papers, but he is neutered and up to date on vaccines. He loves my kids, and seems to love my other small dog (though she's not very fond of him). He's still puppy, there is a lot of love there for the right family. Very playful, loves his chew toys and has destroyed many toy ropes. He does come with a kennel and a bunch of "extras" (blanket, pillows, water/food dishes, etc.). If you are interested, you would technically be his fourth home. He has had two "pit stops".....our family included. I figure he'd make a very good country dog. He needs room to run. Because there are people our there who may have bad intentions....we are asking a re-homing fee to only serious people. Because he is already neutered and vaccines are up to date, I am asking
