QR Code Link to This Post We are, unfortunately, having to sell our tiny house to pay for medical bills. The Tiny house was professionally built and is the 18 ft Cypress model by Tumbleweed Tiny House Co. This and similar models sell for between \$16,000 and \$18,000+ and this one includes some extras:

the tiny house sale includes the framed shell on a trailer specifically designed for tiny houses by tumbleweed tiny house Co., instructions for the build as well as blueprints if you wanted to add dormers, a metal roofing kit with all materials is also included, and enough denim insulation to insulate it twice.

All of this is worth more than twice what we are asking at \$9,999. We would never sale normally, as we had hope to finish it out and place it on our property, but the sale will help cover some unexpected costs that we suddenly accrued.

Price is firm, no trades, cash.
