 Who We Are

 We are dedicated student web designers who strive to give the best service to all our clients. Our work is done with three factors in mind: quality, affordability, and reliability.

 What We Do

 We create and/or modify existing Wordpress, e-commerce, business informational websites, and so much more!
 Your website will be completed in an attractive and user-friendly design. Unless your job is complicated, the website can be completed within 72 hours of starting!

 FAQ:

Q: Why are you known for affordability?
A: Because we're always trying to grow our portfolio as well as consistently help you get the most value for your growing business. You will receive that care from us with the utmost support and customer service.
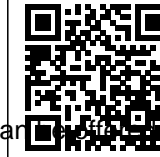

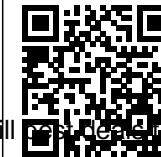

Q: Do you guys host and manage my website?
A: We certainly do! For $9 a month, we fully host your website. This also includes full management and edits for up to two hours each month at no extra charge! Our servers are located with PhotonVPS, making sure that you can rest easy knowing that your website and data will never go offline.

Q: How soon can you get back to me?

A: We know that the business world is always moving, and so is your personal life. Sometimes there just isn't enough time to do everything, that's where we come in. As long as your order isn't too complicated, we can get your website back to you within a week! We reply within hours of your sending your e-mail, meaning we'll get started sooner. And the sooner we get started is the sooner we finish!

Q: I'm ready! What are your payment methods?
A: We accept PayPal for safe and secure transactions for both parties.

Q: How can I contact you?
A: Either shoot us an email at: contact(at)verumdesign.com
OR...
Use the contact form on our website. (Recommended)

Q: Alongside email, can we speak over the phone?
A: Of course we can. On our website, leave your phone number in the box. Give us a good time or day to call and we'll get it sorted! We look forward to hearing from you!
