All modern car locks are very secure so when your keys are locked into the vehicle you need professional assistance. Depending on the vehicle we will either pick the key locks or effect entry by non destructive means, That's guaranteed.

We provide lockout services for your automobile. We can get you back on the road, without too much delay in your trip. We can cut you a new set of keys, help you back into your automobile, and if needed remove any broken key that may have occurred in the process.

We can also provide a new alarm system, an automatic ignition cutoff system, and an automatic start system for your car. We can make your car as safe as possible.

We can cut and programme most modern car keys and remotes. Most Car Keys from 1996 have an immobilisers chip inside them. Without the chip the key will not start the car. We can copy your key and programme, usually at a fraction of the cost of the main dealer.
