QR Code Link to This Post I offer a very straightforward process for providing Original Exclusive Broadcast Quality Background Music that Creates Attitude, Character, and Substance for your songs to help them become fully developed exactly the way you want them. Not in my town? That's OK. I collaborate with you remotely via the internet.

There is a myriad of sites now offering free or cheap backing tracks of other artists music (covers), online automated recording services, and pre-recorded loops for singers, musicians, bands, etc... When buying backing tracks, be aware that you are purchasing the right to use the track and not the original master which remains with the company. They also retain the right to remove permission of use if they feel the user has abused their Terms and Conditions. All music you get from me is 100% owned by you to do whatever you want with it, because it's all 100% Original Your Music Your Way!

For example, if you're a singer and have a guitar player and drummer, but need bass and keys in your recording, then that would be two tracks per song I would provide for you. Or you're a drummer and bass player (singer) act and you need rhythm guitar, lead guitar, and keys, backing tracks for 20 original songs to play live, then I would provide three Instruments per song. Maybe you're a guitarist who wants to record an album and you only need the drums added, then I would provide the Drums as one Instrument (the drums are usually 8 to 16 recorded tracks) per song. You could be a rapper who wants some beats and music for your demo. Who knows, you might want a violin/strings ensemble added to your poem/lyric, etc... Every completed track comes with a standard industry legally signed release form (work for hire) from me. That way you exclusively own and control 100% the master recording, publishing rights, and writers share. You never know when your song could become a #1 Hit, or a "big time" Artist/Band may want to record/buy it, or you might have a placement opportunity in TV/film/media etc.

If you feel it's time to start recording your songs with a world class musician session player and audio engineer getting high quality radio ready results for your music, then give me a try! The giant console, high ceilings, and glass windows mean nothing. Those things don't make great records. A talented person with good ideas for your music does.

It's crucial to remember that the session player, producer (and engineer) you work with imports their personality, taste, and skill on your music.
