My names Alex and I'm a local musician here in Denver

Lately I've been trying something new and making electronic music (Usually I make rock)

It's turned out better than I thought it would lol and now I'm looking for musicians to come sing on it!

I'm thinking a female voice would fit better than a male voice for most of my songs.

I'm also looking for various singers, but if someone wants to sing on more than one song I'd also be okay with that as well!

Most of the songs I have are starting to get filled up, but I still have some songs where they need singing on the chorus and such!

The genre is hard to say because all the songs are very different, but they are all on the basis of electronic music

some are heavy and some are really soft, I even have some rap on the album. I've just been trying everything I can really!

Which is why I understand not everyone will want to sing on every song.

Take a listen below and if you like any of it, let's work on some music! Thanks!
