QR Code Link to This Post What I have here is a Polaris Slingshot that has been heavily but tastefully customized. All the work has been done at "Metricks" in VA which leads the industry in aftermarket products for the Polaris slingshot. Runs great with very low miles and has had all the factory recalls performed and improvements made to the brakes and suspension (adj Coil overs). Led lights have been added to the headlights and wheels that are run off the dash or by an APP that can be downloaded to your phone. The most noticeable modifications are the Metricks twin canopy roof system that opens and closes like lambo doors! The smooth hydraulic movement when opening really takes this slingshot to another level of custom. Each canopy has custom black alcantera and orange headliner's to match the custom made one off seats and steering wheel. This slingshot sports a set of trick painted wheels with 20's in the front and a 22 x 11 wide rear. The rear tire is covered by a Metricks 22/24 rear hugger kit with there license plate relocater as well. Rear spoiler (Sling Wing) and 6 piece Aero splitters (Canards) were installed to add the finishing touches to the plain rear end. This slingshot has been tri toned painted with Titanium metallic grey, Midnight black obsidian and Orange madness pearl to present a jaw dropping response. Everywhere this vehicle is parked creates a crowd and I'm given thumbs up where ever it goes. Why buy a slingshot and customize it yourself when you can buy this one already done. There has been over \$17k spent on customizing alone that I can remember. Asking a very reasonable \$32,000 but will entertain a reasonable offer. Will not accept offers by text if you don't call I will assume you are not that interested and no response will be given. Thanks for the interest title in hand ready to go, Doug
