QR Code Link to This Post We have three Alaskan Husky high-spirited puppies up for adoption! They are litter mates and were born in May of this year! They are in need of a good home! Two of them are intact males and are blackish brown, and the third one is a little smaller and is an intact brownish female! All three are healthy and energetic bundles of life! Their demeanor is very good and they are highly socialized and energetic! We are asking for a \$100 re-homing fee for each dog. They can go to different homes, or be adopted together as a pair or a trio! We are placing these puppies in behalf of a sled dog kennel, but prefer they go to a non-mushing home! (They would be fantastic dogs for a small recreational dog team however, but not a racing dog team). They would be great to go ski-journing with, or to go and hike Flattop with!

Helping one of these puppies will not change the world, but for that one puppy, the world will change!
