QR Code Link to This Post Do you have some old speakers that you were thinking of tossing out? I will refoam those old speakers of yours and have them sounding like new again, for a very reasonable price. Let me know the make and model of your speakers and I will provide you a quote. I have repaired hundreds of speakers of all makes and models and I promise that you and your speakers won't be treated better anywhere else. Thank you, Todd

Testimonials:

Todd repaired my Dad's old Kenwood speakers from the 70's that were going to be thrown out and did it for 1/2 the cost that was quoted by others in town. Not only did they sound perfect, but after getting the speakers after the first week of December he had them done in time for Christmas! Thanks Todd!

My old Boston Acoustics T-830's had been collecting dust until Todd re-foamed them. I'm listening to them again every night again and could not be happier, they are as good as new. The price was more than reasonable, the service professional, and I would recommend him if you need your old speakers repaired. There's no way I would go anywhere else!

Had Todd re-foam a set of vintage Advent/2 speakers. Their odd size woofers required some custom work on the re-foam, but was no problem for Todd. Very fast turnaround and extremely reasonable charges will make me return - BL

While looking on Craigslist I saw an ad for speaker re-foaming that had some before and after pictures. Well I have some Boston Acoustic speakers I bought new in the mid 90's that were in dire need of such service. I had another guy here in Omaha do my sub-woofer about a year ago. It was good quality, but over priced in my opinion. I figured I would contact Todd via Craigslist. He was the what I needed. They are looking for a job cost me less than he quoted me. Now I would not expect this every time, nor would I want his clients to all think their job will cost less. He is not a non-profit business, but... The reason I mention it is a credit to his honesty. He explained what caused the price drop when he had no need to do so and could have charged me the quoted price. Given I am not a man of wealth and I had three speakers done this was very well received on my end.

So if you ask if I recommend Todd and his ability to re-foam a speaker I give you an emphatic YES! I am not a friend or family member of Todd's and I get no kick backs. I am just a very satisfied customer who wants to return the favor of a man who works via word of mouth. If anyone wants to ask me more specific or detailed questions hopefully Todd has my info and can forward your contact info to me. Thank you for your great service and honesty. That is what gets return customers and superb word of mouth. I am glad I took the chance.

Regards,

Shane
