QR Code Link to This Post Rehoming our 5 month old female ferret she is a black footed ferret-sable her name is Bella, because our older male isn't being friendly with her and we don't want to risk it, and I have a lot of medical stuff where I don't feel comfortable having people keep them separate and risking them forgetting ect.) she is fully litterbox trained, in cage and out. She free roams a whole room with access to water/food/cage so she is free roam trained. She doesn't bite or nip, she loves to cuddle and also be silly and bounce around and make everyone laugh, she walks on a harness with no issues she loves to go on mini adventures outdoors(! She is clicker trained, so if you click the clicker she will come, she does pay attention to her name as well as come to treats ect.). She travels great, she's great with dogs/cats/other ferrets she is just a sweet little chunk, she does great with kids and being handled. I want her in the best home possible so I'm not in a huge rush..., I'll list the items she comes with below, I'll rehome with everything or just her + supplies, there is a rehoming fee.

Please \* text with your name and if you currently own ferrets or have or if itd be your first time. Thank you!

- A double unit ferret nation cage which is a single unit with an add on unit
- FN cage liners for each level (blue or purple, reversible) + ramp covers
- Black, white and teal rug, we used as a cage liner she loves to lay on it and we switch it out with the FN liner set listed above
- Toys
- Digging box with packing peanuts
- Food
- Litterbox
- Cage privacy cover
- Litter
- Treats
- Litter bags

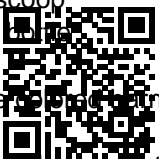

- Litter scoop
- Water bottle
- Bowl
- Mauve towel business we used
- Leash

- She is fully vaccinated/fixated/decented/distemperred
- Cage cleaner
- Sharps too
- Possibly a carrier too, if you need one
- Vitamins for her water
- Bins to organize things under the cage
- Diy bunk bed hammock thing we made
