QR Code Link to This Post I am a professional figure model with many years of experience. The vast majority of my experience has been for drawing and painting, though I've worked with photographers a little bit. I am a regular at pretty much all of the local colleges and art schools as well as some drawing co-ops. That said, I'm always looking for new places to work. I am available to pose for individuals, groups, classes, professional artists, novices, or complete amateurs. It can be for drawing, painting, sculpting, photography, or pretty much whatever you can think of in a formal or informal setting. I am dependable and prompt and frequently complimented on my ability to hold a pose and my professionalism. I'm willing to pose nude outside if weather and privacy permit. While I do not have the lean, muscular physique you may associate with a male figure model, I've been told I'm fun to draw because I have curves. References are.
