QR Code Link to This Post Haven't used this lens that much since I stepped away from pro shooting. It's a shame because it's an awesome lens. It took probably one of my favorite shots of the Counting Crows live. It is the IS series which means it is an image stabilizer, this is priceless as it lets you shoot in lower light with slower shutter speeds. Works fine with no issues. Comes with all the original stuff. New this lens is 1100$ on Amazon. Check the link for specs.
