QR Code Link to This Post I'm in the financial industry and our offices are looking to fill some flexible positions. I'm not particularly looking for a person with a financial background, rather someone who is independent, dedicated, coachable and performs at a high level of integrity. If there's a mutual fit, we provide professional training and one-on-one coaching. This could be a career path or a way to diversify your income while learning and educating others about money. If open, please forward your resume or the best time and number to reach?
