QR Code Link to This Post In an effort to bring back the orderliness of my house immediately after recuperating from my illness, I am searching for a housekeeper to perform the cleaning job for me. This is a one time work. I own an apartment that encompasses an area of five-hundred eighty square feet and contains one bedroom and one bathroom. I just have a couple of furniture pieces. Not much on the walls. I will collect waste and perform laundry. I will do the chore of washing cloths and picking up trash by myself. I need aid with dishes cleaning/kitchen area/fridge bathtub/bathroom sweeping/mopping/vacuum area rug. My home requires a fresh start

I also possess a good cat that will typically hide when there are strangers around.

Go ahead and reply so we can work out on your earnings.

Thank!
