QR Code Link to This Post I am looking for experienced plumbing technicians/journeymen/contractors who are available to work on a water conservation project for a portfolio of multifamily buildings. My company has been contracted to perform water conservation measures for our client who just acquired 8 multifamily properties in Las Vegas. The scope of work will be to replace existing shower heads with low flow shower heads and to replace bathroom and kitchen faucet sink aerators to low flow aerators. It is relatively simple work but the volume is significant enough that it will take at least a month to complete working 40 hour weeks.

We are looking to hire individuals for this contract who are experienced with plumbing, careful, pay attention to detail but also are efficient and reliable. If you or someone you know fits this profile, please send me an email with a short description on your experience and what you require as a monthly salary. Bonuses will be awarded for quality and efficiency. Thank you and please contact me directly with questions, videos on the scope of work are below:
