QR Code Link to This Post I rescued 2 red ear sliders. One is about a year old the other is about 6-7 months. Will come with whole setup. Everything but the tank is new. I got them about a month ago with no heat or uvb, no filter and no way to get out of water. They are eating great now.

Note: the smaller one was born with only 1 eye and a deformed mouth. Neither of them effect how it eats. Rehoming
