QR Code Link to This Post I have 5 florescent lights in my garage. Two are 8' two bulb florescent tube lighting fixtures. The ballasts are out. I am trying to replace them; however, cannot find a ballast that is an adequate for the light. The other are 3 48' two tube bulb fixtures that power is not getting to them. Let me know of your your availability and cost or rate. Also, please give background, any references and contact to talk. Thank.
