QR Code Link to This Post Here we have a nice running Honda GX160 5.5HP engine for sale. This engine is in good working shape. Starts right up on the first or second pull every time and runs great. It doesn't burn any oil or make any weird noises. You can see and hear it run in person. This would be a great engine to use for a go cart project. If interested I'll even throw in a clutch that fits on this engine. The clutch is seen in the last pic.
please no calls after
