QR Code Link to This Post Got a really nice running Cub Cadet snow blower for sale. This snow blower is powered by a 4HP 2 cycle engine which starts on the first or second pull every time and runs great. I have given this unit a tune up which included spark plug, carburetor cleaning and fresh fuel. I have installed a brand new auger assembly on this unit. New scrapper bar installed as well. This snow blower is fully serviced and ready to tackle the harsh winter that is knocking on our door.
