QR Code Link to This Post I bought it a couple of years ago. I am only selling because I am moving and can not take it with me. It is a Samsung's 30" freestanding electric range features induction technology which can boil water quicker than gas and twice the speed of radiant cooktop ranges. Also, because induction uses magnetism to heat cookware directly, the cooktop is able to stay relatively cool to the touch compared to radiant cooktops. The 5.9 cu. ft. oven easily accommodates a big roast, multiple casserole dishes or several racks of cookies. There are three oven racks so you can prepare enough for your hungry guests.

Induction cooktop promotes faster cooking, but is still cool to the touch

1-fan true convection system provides a faster and more even cooking performance

5.9 cu. ft. large capacity gives more cooking flexibility

SteamQuick cleans oven in 20 minutes. I paid over \$1700 for it.
