Built-in Garage Door Opener

Options:
This is the SEL package. All maintenance has been done on this vehicle and there are no issues what so ever. Oil was just changed at 89,500 miles. (Today) Drive it anywhere, it's not going to let you down. Full synthetic oil always used every 3000 miles.

I am looking to trade for a car with good gas mileage or maybe a truck. Corolla, Fusion, Altima, F150, Silverado/Sierra, Ranger.

The passenger door was backed into the parking lot. The damage is not extensive but it has lowered my interest to collect it. Unless you took how bad it is most would drive right by. But I want to be honest with someone looking to buy it. I have included a picture of the worst part of the damage so you can see what that damage looks like. If you like the vehicle, for a walk around and any other details and questions, the interior is in great shape, but I'm asking $250 under the Kbb book. Make me an offer on my price, please do not waste my time with lower offers as my price is much lower than similar vehicles locally.

Walk around:
