QR Code Link to This Post After getting a PS4, I have no need for my old PS3. It is in good condition and works perfectly. I did mod the cover to allow better air flow and added a 1TB hard drive. There is minor damage to the unit, but it works perfectly. This unit can be jailbroken, if that is what you are looking for. Included is the power cord, games, and 2 controllers (with power cord for those as well). Please see pictures. Although I would prefer to sell everything at once, games can be bought separately, if that is your desire. I am charging half of what Gamestop charges for these used games.
