

Ford 801 Diesel Farm tractor (1500 USD)

Location **Montana**
<https://www.genclassifieds.com/x-792971-z>

QR Code Link to This Post This tractor was running a few years ago but has been parked since and needs some attention now . Tires are in great condition but at least one of the rear rims needs to be patched up or replaced (New rim: \$95.00 including shipping on Ebay). Engine fires up on ether but doesn't seem to be getting fuel. Has fresh fuel filter, oil filter and oil has just been changed. Compression seems low so cylinders have been liberally oiled with Marvel Mystery Oil as the rings probably need freed up in the ring grooves. Cranking oil pressure is close to 50 lbs. This model has the Select-O-Shift 10 speed transmission and the more powerful 170 cubic inch diesel engine, and has live hydraulics. With a little know how/work this will make a great.
