My name is Cameron and I'm an experienced Spanish tutor and instructor! I am looking to tutor those interested in the Spanish language! I have just a little bit more availability for another couple of students before I am completely booked up.

I lived and studied in Spain in 2013 and was completely immersed in the culture and became fluent in the language. Not only that, but part of my bachelors degree is in Spanish.

I have taken the OPI through the ACTFL and received a score of Advanced Low which is sufficient to teach the language across educational boards.

Regarding what sorts of lessons/tutoring I can provide, there is a variety:

- Help students / tutor them with existing work for Spanish classes they may already be enrolled in.
- Create private lessons designed on student's needs and goals.
- Teach group lessons with students in similar Spanish level.

My rate is contingent upon what's needed per student as well as the allotted time needed (30 min or 1 hour). I am available during the evenings for lessons.

-Oral practice, grammar, conversational practice, tutoring for current workload in academic courses.

Feel free to call, text, or email me so that we can set up a time to meet and move forward with Spanish! I can be reached at three zero nine - five three one - one eight three.
