QR Code Link to This Post Beware of these people out here selling obviously sick kittens for exorbitant prices!! The poster in New Ipswich the kitten is raggedy looking and clearly has an eye infection with pus, and the one in Manchester also has runny eyes but they made sure to hold the kitten up in the picture so you can really see its belly full of worms too!! So many people getting scammed these days on here, buying kittens in parking lots from sketchy people for a couple hundred or more, then bring it home and realize they got fake vet records (or a big fat lie about where the records are) and the kitten is underaged, undernourished, and extremely sick. Thousands in vet bills to try to save the kitten and half the time they die anyway. Not worth it. Don't feed in to these people trying to make their living off poor defenseless.
