QR Code Link to This Post Studio Electrique - Sound and Circuitry Recording.

Is a small project studio that bridges the gap between larger, more expensive studios and the lower end inexperienced studios.

Just moved to a new place, expanding the recording space.

I like to take on a few projects a month, keep it personal.

I am frequently called when less than stellar/personal results happen at larger, more expensive studios.

I specialize in vocals and productions using unorthodox instrumentation;Synths, workstations, MPC's, non-traditional musicians.

I also offer instruction in recording/engineering, as well as troubleshooting various recording devices. I also can consult on your personal studio setup. Ask, I may be able to help?

I am a web designer by day, I can setup Bandcamp/WordPress/FB/Soundcloud Music sites, as well as merchandising/payment gateways.

-Studio Electrique Vitae-

The studio is based around Steinberg Nuendo and Ableton recording system. Able to import Pro-Tool sessions, as well as other DAW formats.

<p>have a nice comfortable room for recording both/rock</p> <p>have a nice comfortable room for recording both/rock</p> <p>My sample library is second to none. Medieval and symphonic instrumentation, esoteric analog synths, to current drum kits and sounds.</p> <p>I am small but quality. Why go to a larger studio?</p> <p>I currently do full band recordings on Sundays in a comfortable site on Carnegie in Cleveland. Comong soon!!! on site in my house.</p> <p>Studio rates are negotiable by project</p>	<p>have a nice comfortable room for recording both/rock</p> <p>have a nice comfortable room for recording both/rock</p> <p>My sample library is second to none. ---

I currently quote a flat \$18.00 an hour, other variables are time blocked and budget/time requirements.
