QR Code Link to This Post I have a 46 GMC Truck that I'm looking to get painted. The truck is currently sprayed with a 2 part epoxy. A majority of the body work is completed. There is most likely some left . I'm not a professional, but I can get it close.

The truck will be painted a red/maroon metallic color (the same color as the interior currently is)

I'm looking for someone who will take the front end apart and paint it. Looking for a good job done. There is a lot of time and money in this truck, and I want the paint to compliment that.

Truck is located in Menomonee falls. If you would like to come check it out, give me a call text or email
