Dry Master Dry Cleaning Technology is different than any other carpet cleaning method in the industry because it gets the deep down dirt without soaking, shrinking, mildewing, warping, molding or leaving any sticky residue afterward. . . GUARANTEED. We know once you try us out, you will never need another cleaner again. Hot Shot Cleaning/DRY MASTER Affiliate.

website: hotshotcc.blogspot.com

Carpet cleaned with the DryMaster System uses a Dry Shampoo Extraction method without using unnecessary gallons and gallons of water. The DryMaster Method makes the carpet stay cleaner longer and dries within 1-2 hours! A safe and thorough system with a history of more than 13 years of cleaning the world's finest Homes, Offices, Hotels, Universities and Government Buildings.

Our equipment has a cylindrical brush built-in that cleans down to the base of the carpet (unlike rotary brushes which simply clean the surface) at the same time, a powerful suction lifts out dirt in seconds.

Only Dry Master's carpet extraction system applies a dirt emulsifying dry shampoo and brushes it thoroughly into the carpet. This simultaneous operation is an important benefit and only Dry Master's low moisture soil extraction system has this feature. Because low moisture is used, your carpet is ready to use in a few short hours. And there is no risk of dry-rot, browning, mildew, shrinkage or even the risk of carpet buckling.

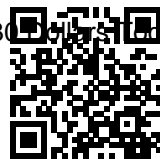

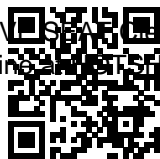

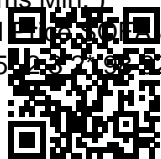

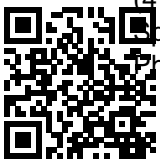

Remember, Dry Master's cleaning method is way better and safer to use on your carpets which is one of the most expensive investments in your home, so why risk it!?
