

If you're having your kitchen cabinets painted, have them painted by a professional as kitchen cabinets are like furniture and should only be painted by a professional cabinet painter for the high quality alkyd, professional results you want for your home.

We can paint your old out dated kitchen cabinets and for an instant home update. Old stained cabinets are out dated, like paneling from the 1970s, YOU KNOW THE LOOK.

We first carefully remove your cabinet doors, and drawer fronts, label them and remove the hardware. We then transport them to our facility, they are cleaned and sanded, vacuumed and tack clothed. Then they are HVLP primed, in our spray booth, using the best alkyd, cabinet bonding primer, all sides. Then we HVLP apply two finish coats, of the best alkyd, cabinet paint, in our spray booth. Then they are returned to the dust free, climate controlled dry room to begin the curing process. We then wrap each piece, for protection, during transport back to your home for re installation.

We are cabinet professionals, we concentrate our talents and skills on your kitchen cabinets. Visit our website: www.inypicalcabinets.com 2015. All rights reserved. We Are Inypical Cabinets

Our shops are located in Blacktown, NSW, where we have personally selected the cabinetry that we are only minutes from the location of the new island.
