QR Code Link to This Post Looking for a drummer who can send samples or tracks I can record bass over and then send back to maybe work out kinks and develop a song. Then I'd do the guitair, vox, or whatever. It'd be a back and forth ala postal service. Always wanted to do this.

I've been playing for several years and my influences come from everything. I'd really like to do something original. I'm mostly a bassist though can hold my own on guitar. I can sing, rap, and write lyrics. Played in jam bands, metal, hardcore, indie, blues, jazz, folk acoustic whatever.

Tell me what kind of music you would like to play and we should go from there. Of course I'd sign something that says I won't run off with your tracks and 50-50 if we get that far down the road.

Cheers,
