QR Code Link to This Post Hello! Are you wanting live drums on your songs? I'm a professional Session Drummer with over 24 years experience. I offer High Quality Drum Tracks for clients worldwide. I am affordable and Fast with a 24 hour turnaround time! All I need is an MP3 or WAV file of your song and I can get started. Once we settle on the \$\$, typically a client sends me the song/songs with or without drums with the tempo. I then ask if there is an idea or sound that they have in mind and what sample rate and bit depth they need. After that I will do a few takes to give them a few different feels and let them pick which one they want. Once they are happy, I will upload the tracks to my Dropbox account or Google drive. And email the link where they can download the individual drum stems. And that's it! It's a pretty easy and cost effective process for artists who just need drums to finish their project or clients looking to start their session with a professional sounding foundation. Reply with questions or check out my SoundCloud page for examples of some of my drum sessions.
