QR Code Link to This Post Reply to this AD if you are like minded, SERIOUS about research. Trying to organize a small group research trip come spring. Takes a lot of planning before hand. Not looking for weekend warriors and hunt to kill nut jobs. I will interview till I pick the first associate. Then myself and that person will work together to choose the next person and so on and so on. Till we have 4-5 good team players.

This is NOT A JOB FOR PAY, you must have your own funds and basic equipment for hardcore camping, hiking and the like. Persons with education, training or experience that relates to this type of exploratory research is what Im looking for. FYI, even if your a skeptic but are serious about proving one way or the other the validity of this myth. You can be considered for this trip. Dependent on how this first trip goes, I am already planning 2 other trips outside the state of AZ.

Alphabetical List of All Creatures:

A

Abominable Snowman

African Peacocks

Ahool, Olitiau and Giant Bats

Air Rods
