Abhiforce 100 mg is a product which is very effective regarding the treatment of erectile dysfunction in males. The active ingredient used in this product is referred to as sildenafil citrate (100 mg). This 100 mg product is prescribed for the treatment of Erectile dysfunction in men and is one of highly effective product available in the market for this problem. Ed in men is regarded as a widespread problem today. So its solution is required for making men more confident and satisfied in their personal lives. Abhiforce 100 mg has a slightly higher dosage so for a beginner we will not suggest this although we will suggest with the lower one that you can begin with. To get rid of this large stone from your sensual life you have to consult your doctor as early as possible so that you can have a simpler life. Drinking alcohol is not recommended with the intake of this medicine. This should be taken at least 30 or 60 minutes prior to having intercourse and one should Swallow this medicine with a glassful of water and is not chewable or broken into pieces.
